WIRED JAPAN

NEDO Challenge

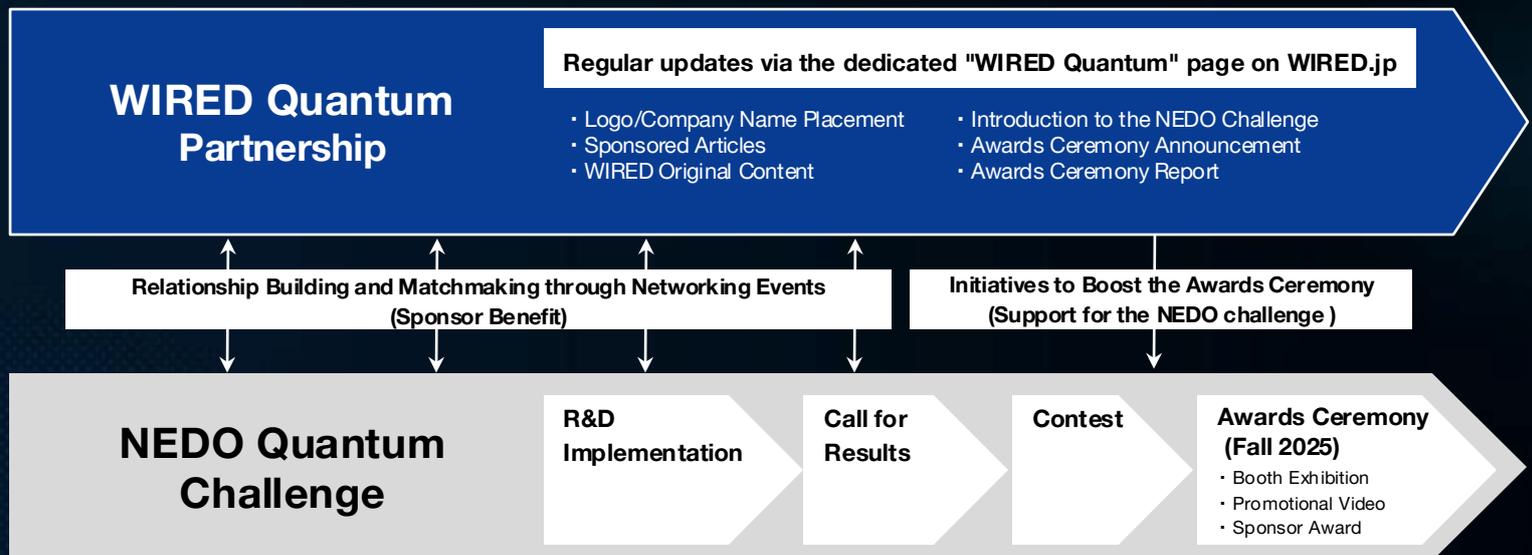

Quantum Computing "Solve Social Issues!"

The **NEDO Challenge, Quantum Computing "Solve Social Issues!"** (hereinafter referred to as "NEDO Quantum Challenge") is a program that solicits a diverse range of ideas and solutions to address technological and social challenges in the field of quantum computing. This program adopts a prize-based, contest-style research and development format.

By promptly identifying promising ideas that can help solve future social issues and foster new industries, the program aims to create opportunities for joint research and to promote their practical application and commercialization.

In partnership with the global technology media, WIRED, the **WIRED Quantum Partnership** offers a sponsorship program. This initiative enables large-scale events and flexible matchmaking opportunities — activities that are difficult to achieve solely through the publicly funded NEDO Quantum Challenge.

Supported by sponsorships from private companies, the partnership aims to enhance the NEDO Quantum Challenge and accelerate the societal implementation of its outcomes.

Use of Sponsorship Funds

(How Funds Contribute to the NEDO Challenge)

- Enhancing the Awards Ceremony
- Supporting Relationship Building with Sponsors
- Management and Operation of the special site on WIRED

Sponsor Benefits

- Company promotion opportunities at the Awards Ceremony
- Matchmaking opportunities with participants of the NEDO Quantum Challenge
- Brand exposure in promotional media

At WIRED Quantum, we can customize sponsorship plans to meet your specific needs, including non-financial forms of support. For more information, please feel free to contact us at the address below.
